GPS Tracking System

Description

GPS TRACKING

Instanta GPS Tracking System is a user friendly solution that provides real time location updates for assets and vehicles. It captures GPS data from the devices and displays it on a map or a dashboard, providing users with accurate information about the location and movement of the tracked objects.

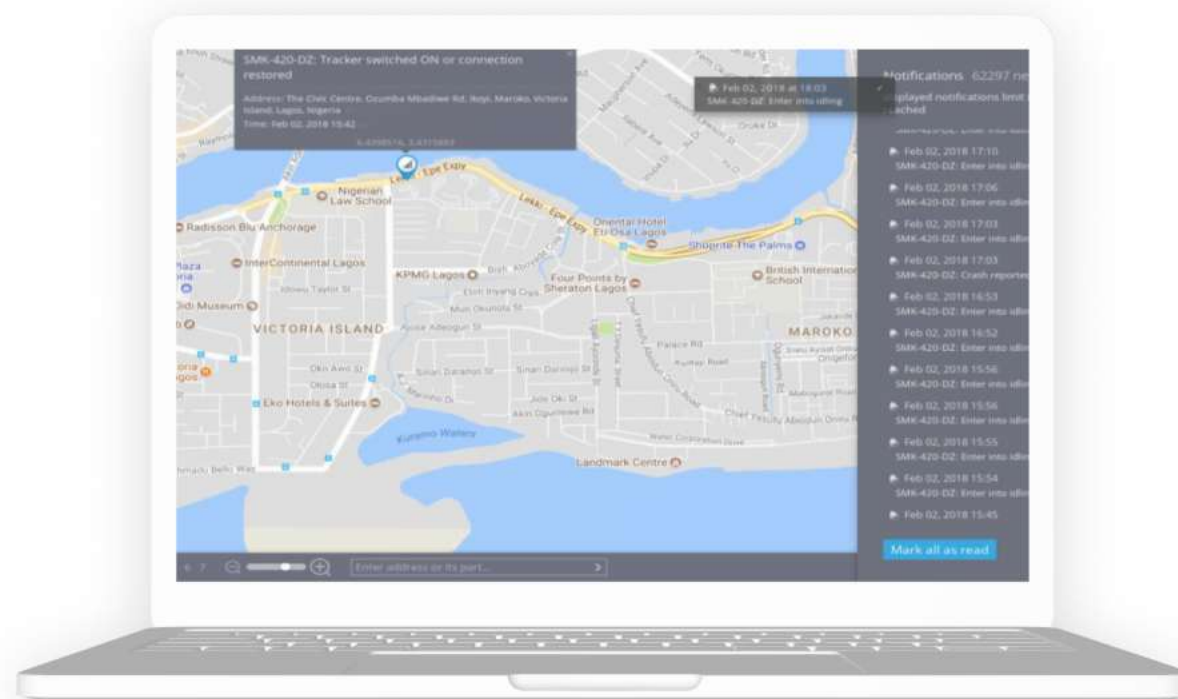

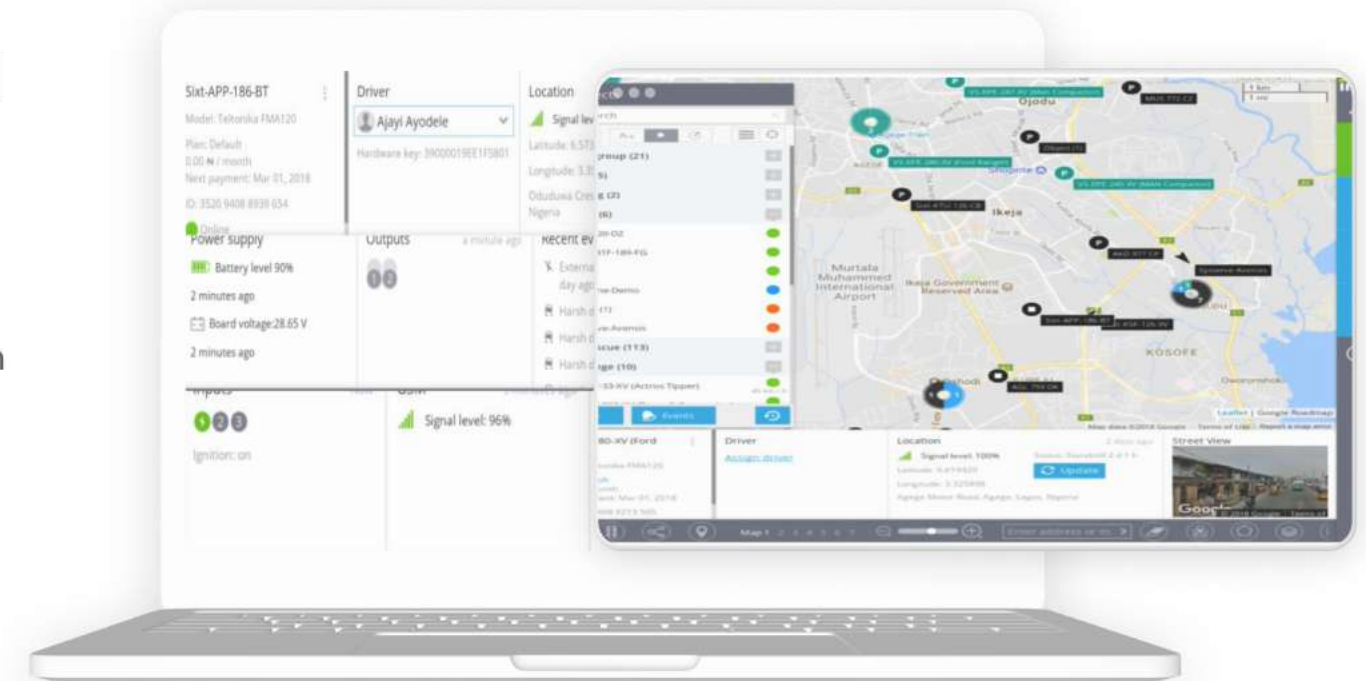

Instanta GPS Tracking System can be used in various industries, including logistics, transportation, and field service management, to optimise routes, improve delivery times, and enhance overall efficiency.

Additionally, the software can also provide alerts and notifications for specific events, such as vehicle maintenance, speeding, or unauthorised use, allowing for quick action and increased security.

FEATURES

Extensive mapping capabilities and advanced GIS tools

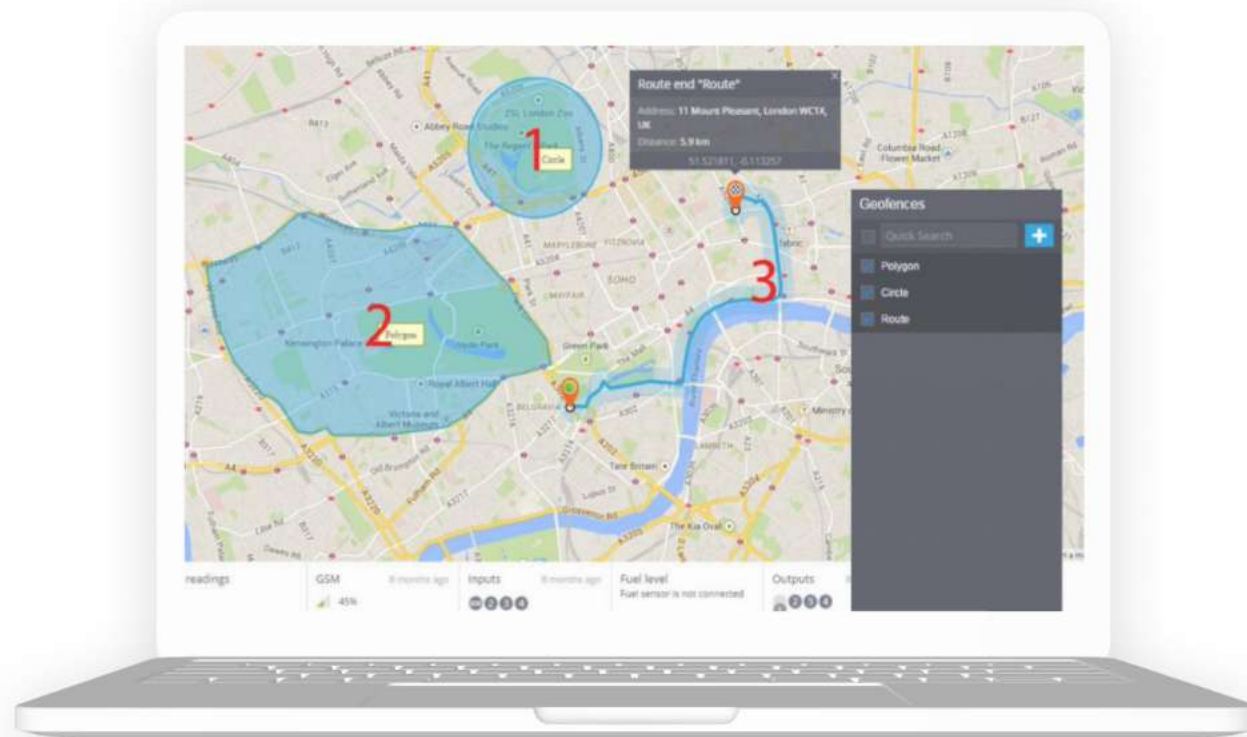

The Instanta GPS Tracking System boasts cutting edge mapping and GIS capabilities, enabling users to obtain real-time location information and precise visualisations of assets, vehicles, and personnel. Its geofencing and historical tracking features allow for monitoring of driving habits, fuel usage, and job proficiency. The user-friendly interface streamlines operations, boosts productivity, and facilitates informed decision making.

Real time tracking

With real-time tracking, you can monitor the location and movement of your assets or vehicles in real-time, as they happen. This provides you with a live view of your assets' current positions, helping you to make informed decisions and respond to any issues quickly. With our GPS Tracking Systems real time tracking feature, you can have peace of mind knowing that you have complete visibility over your assets' whereabouts at all times.

FEATURES

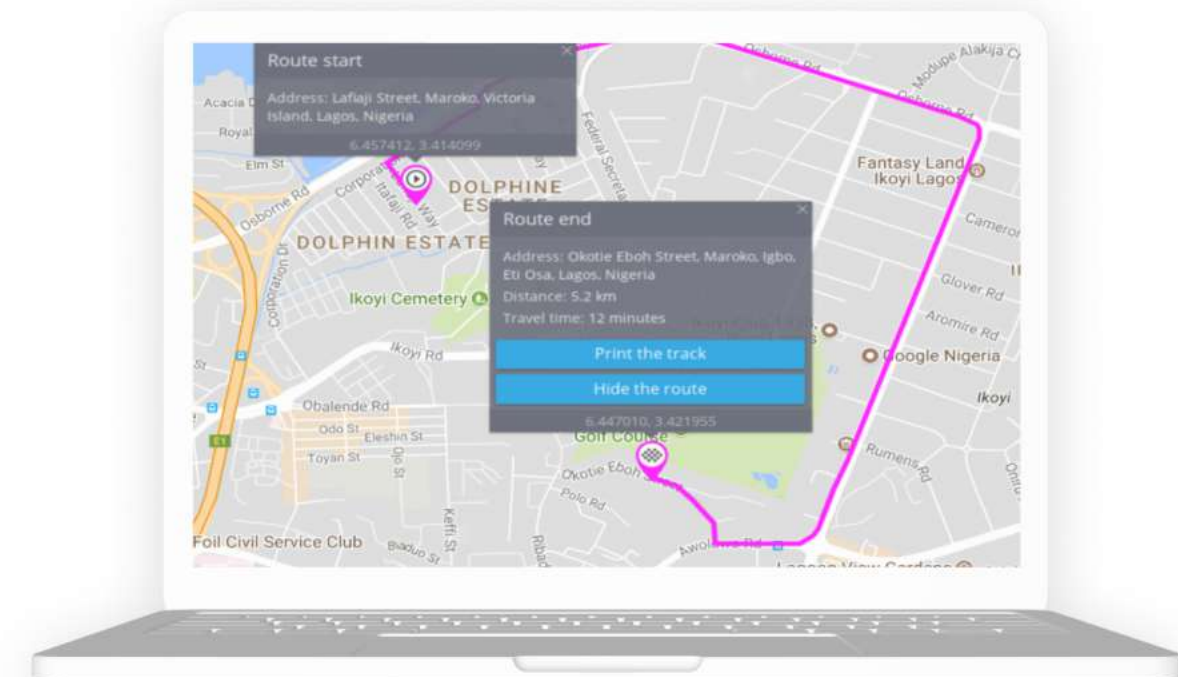

Route Mapping

Instanta's GPS Tracking System provides businesses with accurate and up-to-date route mapping information, including traffic updates and alternative routes. This feature helps businesses optimize routes, reduce fuel consumption, and improve delivery times.

Automated Security Alerts

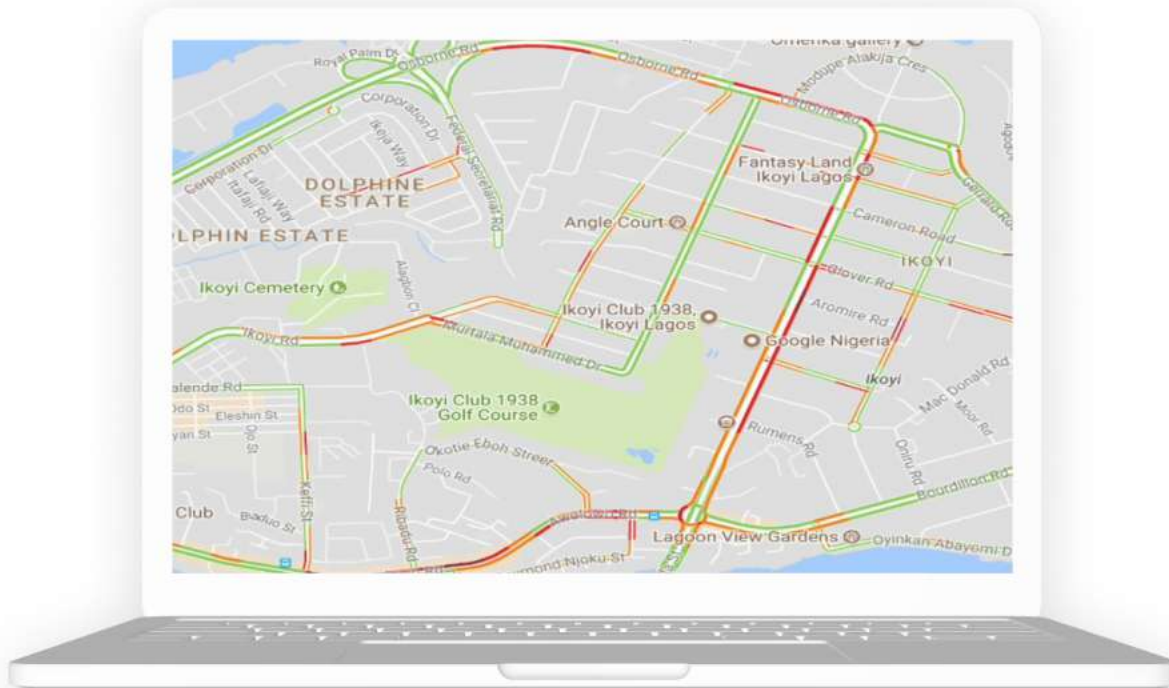

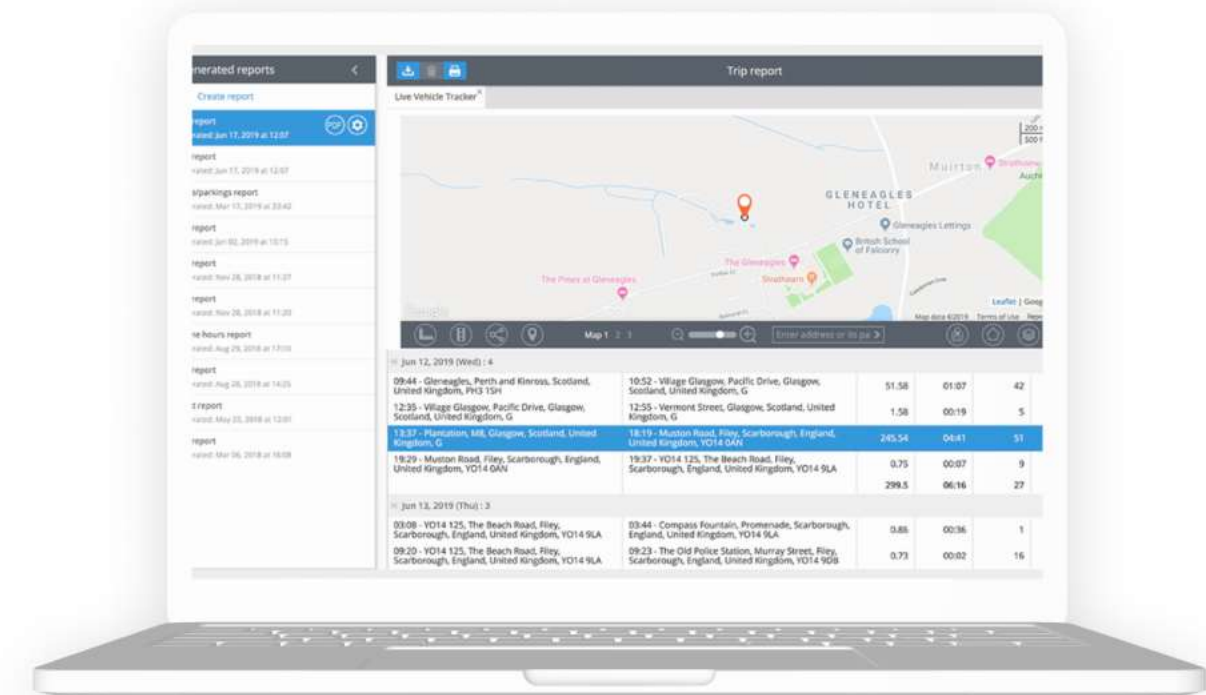

One of the key features of our GPS tracking system is automated security alerts. With this feature, you can receive instant notifications when any of your tracked vehicles or assets deviate from their usual routes or exceed set boundaries. This allows you to proactively respond to any potential security threats and take necessary measures to safeguard your assets.

FEATURES

Trip History

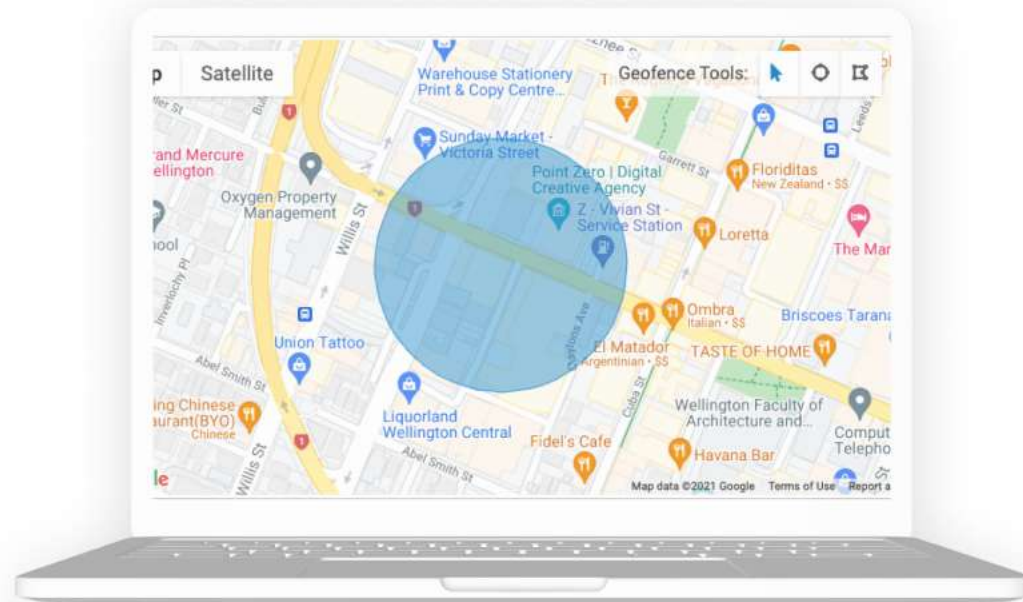

With the Trip History feature, you can easily keep track of your vehicle's past journeys. Whether it's for personal or business use, this feature allows you to view a detailed history of all trips taken, including the date, time, distance, and duration of each trip. With this information, you can monitor driving patterns, optimize routes, and ensure that your vehicle is being used efficiently.

Live Traffic

Instanta's GPS Tracking System helps businesses monitor fuel consumption and identify areas where they can reduce fuel usage. This feature helps businesses save money and reduce their carbon footprint.

FEATURES

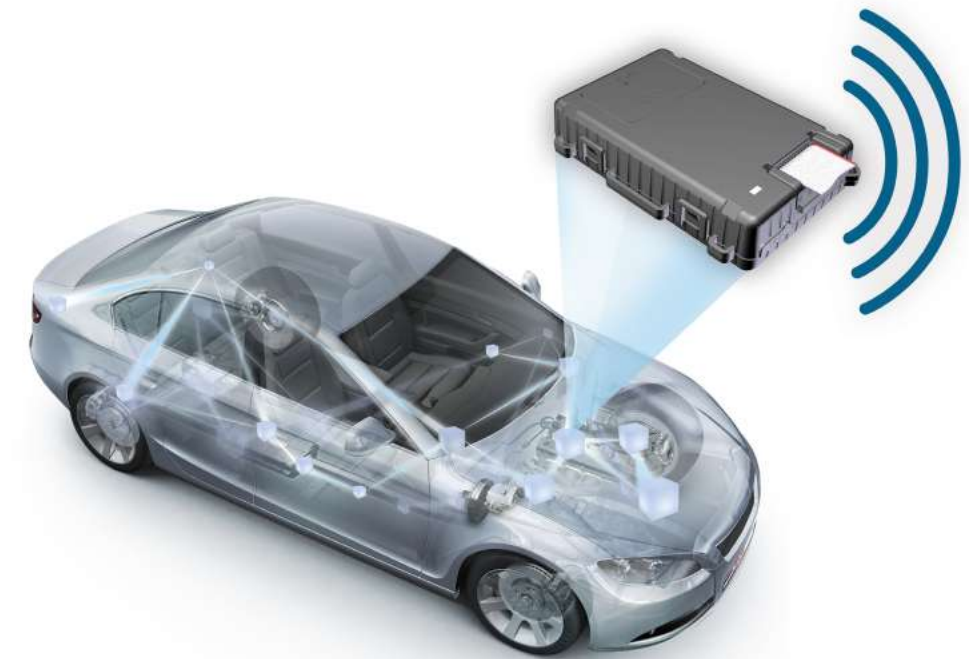

Geo-fencing and Points of Interest (POI)

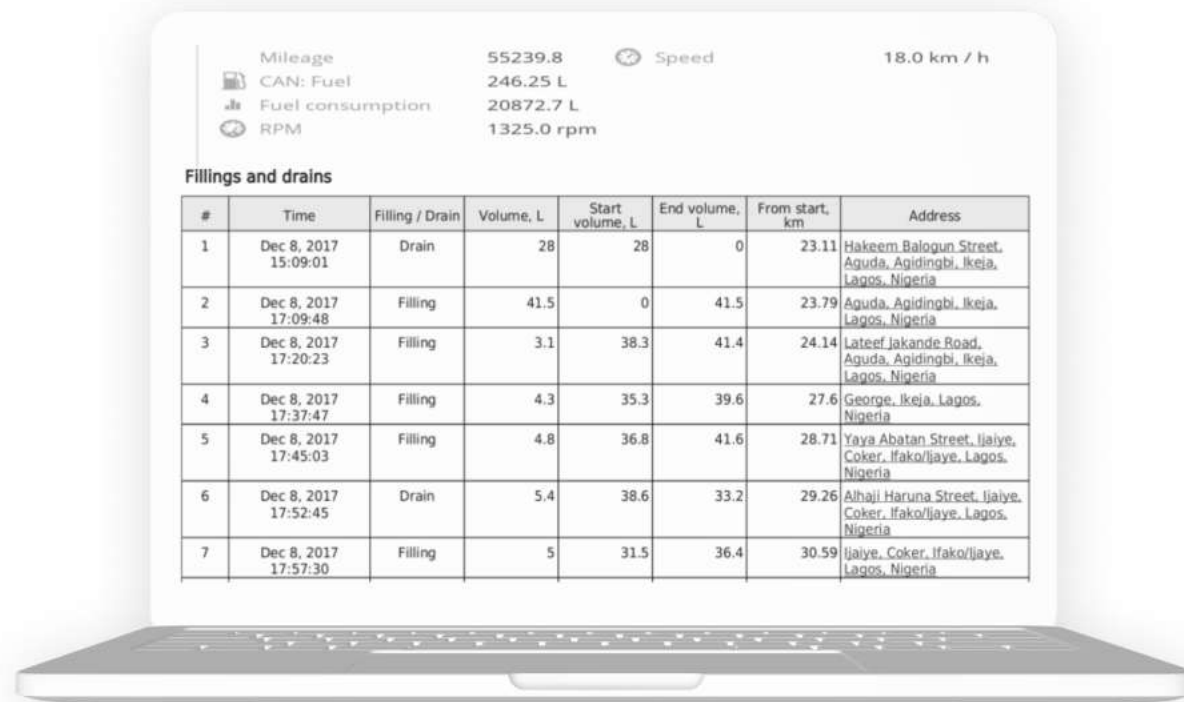

With customisable geofence zones, you can effortlessly monitor and manage movement within designated areas. Receive instant alerts whenever a vehicle enters or exits a geo fenced zone, ensuring enhanced security and real time situational awareness. Additionally, our system enables you to mark essential Points of Interest POI on the map, making it easier to locate and track specific locations of importance.

Remote Vehicle Shutdown

Instanta GPS Tracking System offers a cutting edge remote vehicle shutdown capability, providing you with an extra layer of security and control. In case of unauthorised vehicle usage or emergency situations, you can remotely disable the vehicle's engine, effectively immobilising it until the situation is resolved. This feature acts as a powerful deterrent against theft and unauthorised access, enabling you to protect your assets and maintain peace of mind.

FEATURES

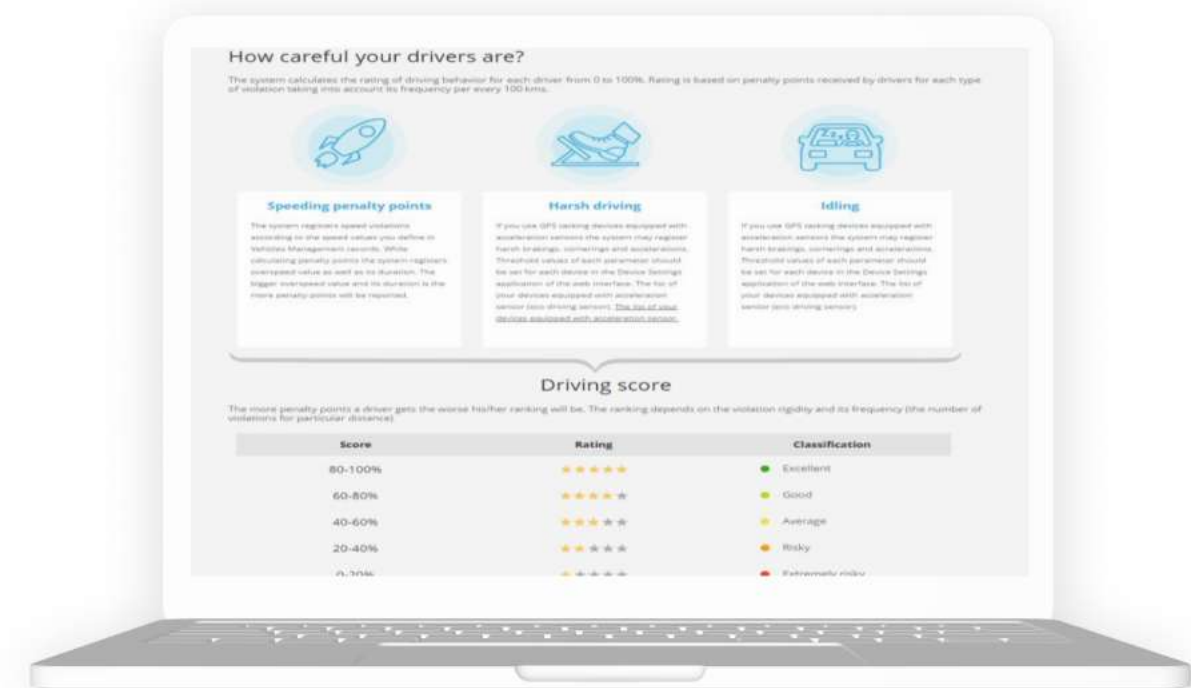

Fuel Monitoring

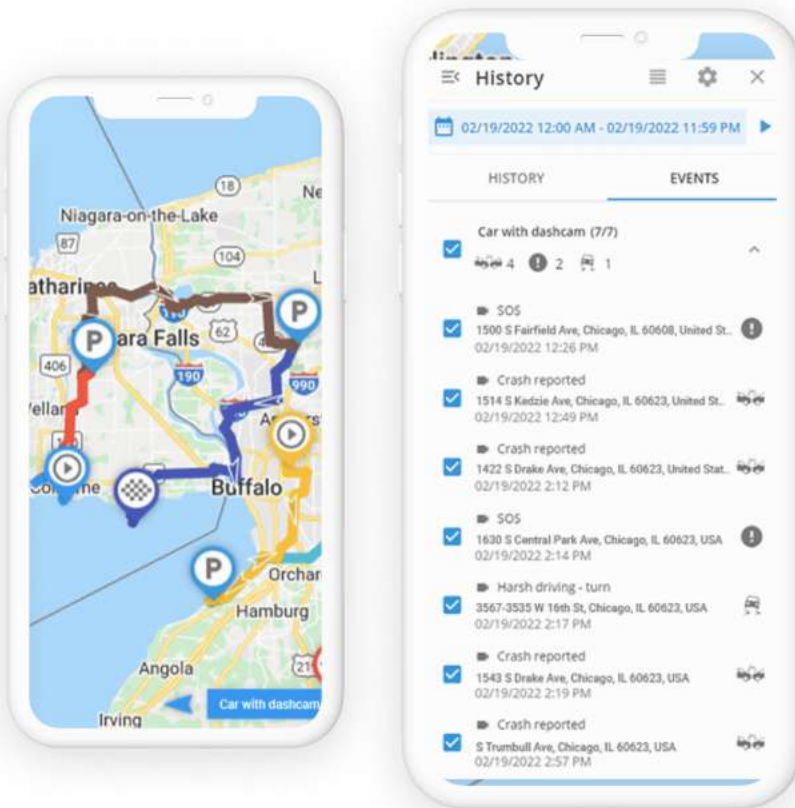

With this advanced technology, you can keep an eye on your vehicle's fuel consumption and track its efficiency in real time. Our system provides accurate and detailed reports on fuel usage, allowing you to identify areas where you can reduce fuel consumption and save money. Additionally, you can set up alerts for fuel theft or unauthorised use, ensuring that your vehicles are always safe and secure.

Eco Driving (Driver's Behaviour)

Instanta's GPS Tracking System allows businesses to monitor driver behaviour, including harsh braking and acceleration, speeding, and idling. This feature helps businesses identify areas where drivers can improve their driving habits, reducing fuel consumption and vehicle wear and tear.

FEATURES

Mobile Access

Instanta's GPS Tracking System provides businesses with mobile access to fleet data and reports, allowing them to monitor their fleet from anywhere, at any time. This feature provides businesses with flexibility and real-time information, allowing them to make informed decisions on the go.

Integration with Other Systems

If you happen to possess a GPS tracker on your vehicle for migration assistance, we are able to provide support for it. Our tracking system is compatible with 1000 GPS devices manufactured worldwide, ensuring that you need not be concerned about compatibility problems.

FEATURES

Multiple Device Support

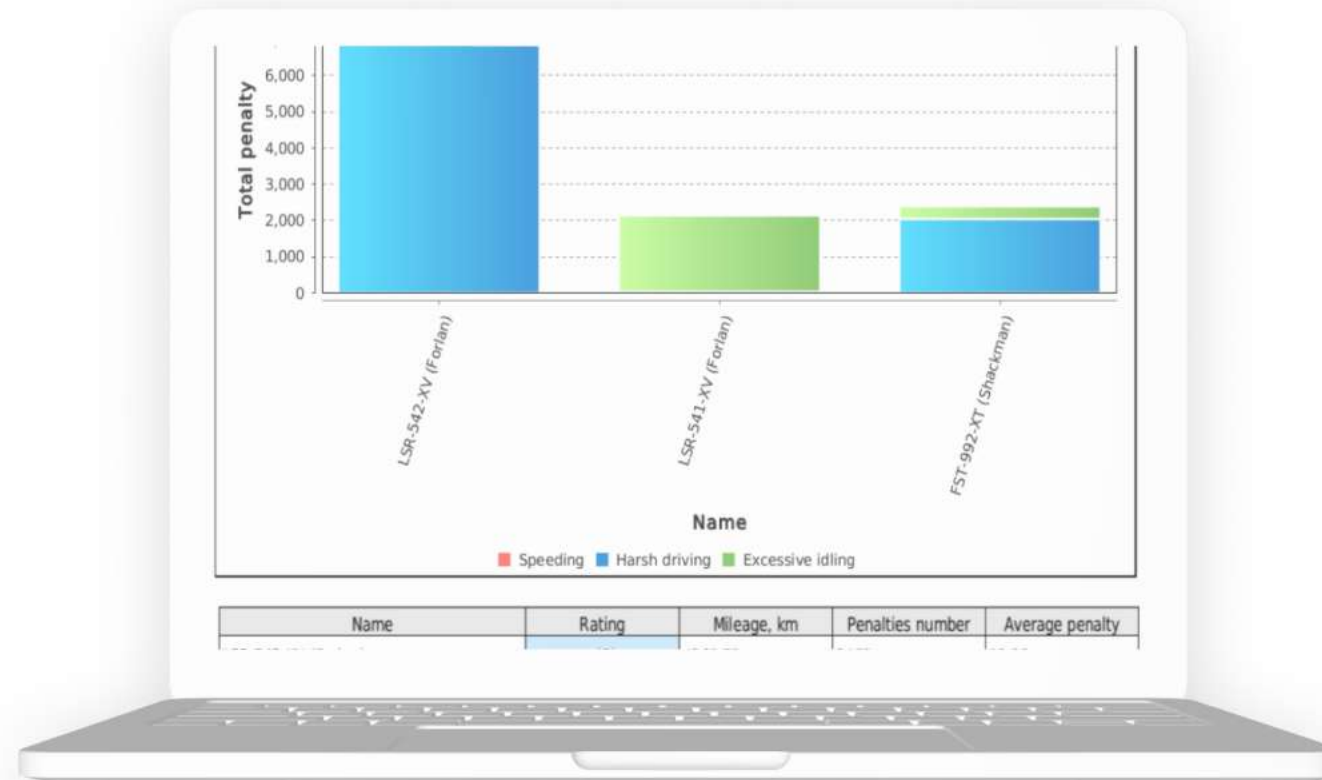

Instanta's GPS Tracking System supports multiple devices, including smartphones, tablets, and desktop computers, allowing businesses to access fleet data from any device. This feature provides businesses with flexibility and convenience, allowing them to monitor their fleet on the device of their choice.

Data-driven Decisions

With our system, you can access real-time and historical data about the location and movement of your vehicles, assets, or personnel. This data can help you make informed decisions about route optimization, resource allocation, and other important aspects of your operations. By leveraging the power of data, you can streamline your processes, increase efficiency, and ultimately drive more success for your business.

FEATURES

Custom Reports

Our GPS Tracking System's custom reports feature allows users to generate tailored reports, selecting specific data points and choosing formats and layouts. With this feature, users can gain valuable insights into fleet operations, improve efficiency, reduce costs, and enhance safety.
